Projects

Personal Project - Tailwind-schemes

June 2023

The first open-source plugin to support dynamic color settings for multi themes on tailwindcss.

Reached 1300+ downloads in the first week of public release of version 1.0

<https://www.npmjs.com/package/tailwind-schemes>

<https://github.com/onepercman/tailwind-schemes>

Personal Project - React-tvcx

May 2024

react-tvcx is a library that provides functions to help users create a reusable component system for their projects using React, Tailwind CSS, and TypeScript. It simplifies the creation and management of components with support for variant styles and context-based slot management.

<https://github.com/onepercman/react-tvcx>

<https://www.npmjs.com/package/react-tvcx>

Personal Project - use-valtio-store

January 2024

This React hook provides a way to manage state using Valtio, supporting persistent states with localStorage and sessionStorage.

<https://github.com/onepercman/use-valtio-store>

<https://www.npmjs.com/package/use-valtio-store>

Personal Project - MojaUI React

June 2024

Open-source reusable ui library built on TailwindCSS and Ark-UI

<https://www.npmjs.com/package/@mojaui/react>

<https://github.com/onepercman/mojaui>
